

# On-Demand Inflatable Packaging Systems

airsafe®

# AIRSAFE® Floor Bin System

## Delivery

The innovative delivery accessory provides user-friendly operation and prevents waste.

## Storing

It is providing on site storage of inflated Airsafe® air cushions. Already inflated Airsafe® cushions are stored in the bin to supply effectively to one or more packaging stations.

## Inflating

Airsafe® Inflating Machine inflates all types of air cushions with its unmatched inflating capabilities. Production speed, inflation volume, and length are adjustable for superior product protection and efficiency.

## Empty/Full Bin Sensor

It allows the system to automatically stop or continue filling the bin by sensing the fill rate.

# AIRSAFE® Overhead Bin System

## Empty/Full Bin Sensor

It allows the system to automatically stop or continue filling the bin by sensing the fill rate.

## Inflating

Airsafe® Inflating Machine inflates all types of air cushions with its unmatched inflating capabilities. Production speed, inflation volume, and length are adjustable for superior product protection and efficiency.

## Delivery

The innovative delivery accessory provides user-friendly operation and prevents waste.

### Airsafe® Air Cushion Inflation Machine

Easy for handling and inflation of all kinds of Airsafe® air cushion films.

- Airsafe® Air Cushion Inflation Machine is cost-effective. It allows operation efficiency in compact areas and workstations where various kinds of solutions are required.
- Custom-built machine according to any business size
- Cushions in seconds
- Plug and use
- Easy roll change

### Airsafe® products protect cargo in style.

Cargo reaches the end-user with a professional appearance and improved customer experience with Airsafe® Inflatable Packaging Systems.

Our range of superior films can meet any customer need from economic void fill to high-performance cushioning for long shipping and storage cycles.

### Airsafe® on-demand inflatable systems offer solutions for customers in various areas:

- Increases productivity
- Decreases the number of damaged goods
- Minimizes material and labor costs
- Reduces freight costs
- Optimizes storage space
- Provides a positive customer experience
